CanProx One SCR

SECURE CREDENTIAL READER

The CanProx One Secure Credential Reader offers the flexibility of both door mullion or wall mounting in a single reader solution. It uses the latest MIFARE® DESFire® EV2 credentials which provide the highest level of security available in the market today.

The reader mounts on a standard door mullion but also comes with an attractive adapter plate that allows mounting on a single-gang electrical box. This innovative design eliminates the need for two separate reader models.

CanProx One SCR assures compatibility with electronic access control and time & attendance systems by using an industry standard Wiegand interface.
