

ChimeCom (C-123L) Series Door Answering and Audio Monitoring Sets

Residential and Commercial Applications

Features and Benefits

Replaces doorbell, easy to install

Reduce installation costs by using existing doorbell wire. No doorbell? *No problem!* The system only requires two wires, making installation a snap!

DC powered or battery operated

Choose your preferred method to power the system: a 6V DC power supply or four C batteries.

Pull cord included

Mount the master station in the exact location of an existing doorbell chime and use the pull cord to communicate.

Door release

Push the door release button to conveniently unlock the entrance directly from the master station.

Audio monitoring

Discreetly listen to activity at the door station with either the push of a button or the pull of a cord.

Affordable system

Maintain your budget with this affordable, simple-to-use system.

Reliable and designed to last

Install the system and have trouble-free use for years to come!

Upgrade any doorbell to an Aiphone intercom for 2-way communication at the door!

Components

Box Sets: select 1 (door station not sold separately—choose C-123L/A for a 1x1 system or C-123LW for a 1x2 system)
