

Activor[®] Wiegand Remote Control

Reduce costs, decrease lead times and improve your competitive edge. We are offering you the reliable and cost-effective Wiegand remote control with related programmers. These Wiegand remote and prox tag programmers are specially designed to enable fast and efficient programming.

Our patented remote design allows a prox tag to be easily inserted into the remote without opening the case.

Wiegand Receiver

RRW01

Remote Programmer

RTW-PGM

Wiegand Receiver Features

- Wiegand 26 bit, 4 channels, each with an LED indicator
- Option of site-code-verification or non-code-verification (all pass through)
- 433Mhz; other frequencies available on request
- IP67; indoor receiver also available (P/N: RRW02)

Wiegand Remote Options

- RTW19 – Features a patented design which allows the prox tag to be easily inserted into the remote without opening the case
- RTW01 – Features a sliding protective cover to prevent accidental button activation

Note:

1. All remotes can be fitted with a prox tag (125KHz or 13.56MHz)
2. Two-button versions of remote RTW19 and RTW01 are available (P/N: RTW19-2 and RTW01-2)
