Red and blue flash: Connect to WiFi successfully

2

RESET Button

To reset the device, long press this button for 5 second

Battery Slot

Support 2 * 18650 battery / 2 * 21700 battery

USB Interface

Micro USB port charging

Mounting Port

Use this port to mount the camera to bracket

Setup the Device

Thank you for choosing our products! Please follow below instruction to setup and use your doorbell device.

1. Downloading and installing the APP

Open App Store (for iOS) or Google Play Store (for Android) on your device, search for "TuyaSmart" or scan QR code as following to download the right App for your device.

3

2. Setting up the APP

Before you begin:

- > Make sure the TuyaSmart APP is installed to your device
- > Make sure that your device is connected to a 2.4GHz Wi-Fi networks, 5GHz network is NOT compatible.

User Register

New user register it according to guide steps, already registered user just login it

3. Add the device

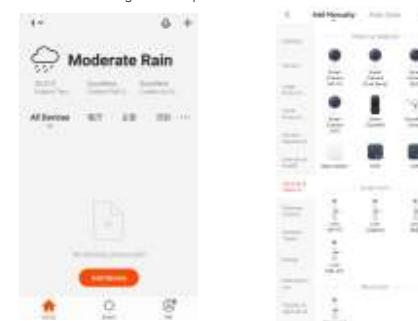

Before add, make sure the device is in configuration— with a voice notification "The camera is now ready to begin pairing." (Blue light blink per 1s)

If you didn't hear the voice notification, please RESET the device by pressing the reset button 5 seconds. You can release the button after the LED indicator turned off, the device will restart to default setting automatically.

4

Open the "TuyaSmart" app and tap "Add Device"
Select device type: Security & Sensor - Smart Doorbell, then make connection with the device according to the steps

Choose "next step", the name of the WiFi network will automatically be filled in, enter the WiFi password and tap "confirm".

Note: The App will fill the corresponding password automatically if connected with the same WiFi, and you don't need to fill in password again.

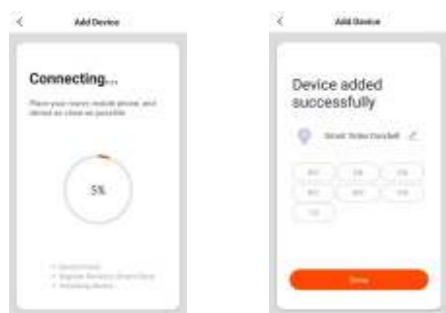

5

Choose "Continue" and use camera to scan the QR Code show on your phone, make sure about 15-20cm distance between the mobile device to the doorbell. When you hear the prompt, tap "I heard a Prompt" and waiting for device connection till success.

If your camera fails to connect, please try to RESET the camera and repeat all steps again.

When the app show Device added successfully. Congratulations! The device is ready for use now!

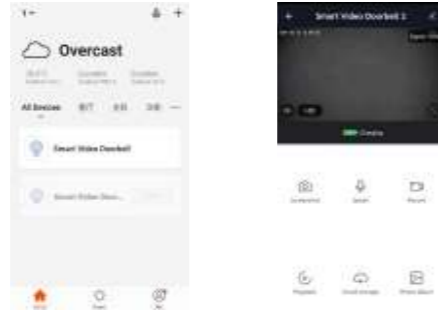

6

4. WiFi Doorbell Functions

Support following functions: Two-way Audio; Video recording to local file; Take Photo; Playback video on Micro SD card.

*Off: Close PIR function.
*Low: Wake up and record footage if any motion in front of the camera last for more than 7 seconds been detected. A notification will be sent to mobile devices at the same time.
*Medium: Wake up and record footage if any motion in front of the camera last for more than 5 seconds been detected. A notification will be sent to mobile devices at the same time.
*High: Wake up and record footage if any motion in front of the camera last for more than 1 seconds been detected. A notification will be sent to mobile devices at the same time.

8

Note: In crowded environment, it is recommended to close or set the device to LOW sensitivity to reduce unwanted wake up and notification push to extend battery life.

5.7 Memory Card Settings

Click "Memory Card Setting" to check Micro SD card status, include total capacity, used and remaining capacity or format memory card.

6. Note for using

a. When device is powered by rechargeable lithium batteries. With fully charged, the battery life approximately could be around six months. The mobile device APP will send notification when battery voltage is low. Please charge the device in time if you get the notification.

b. Keep the camera within your router's range. Make sure to pick a place where is covered by your WiFi signal. Thick or insulated doors can greatly reduce the strength of your WiFi signal even if your router is close by. Trial test before installing the camera is recommended.

c. The device is designed base on low power consumption component, it could be remotely wake up from the APP, by PIR human motion detection, or doorbell press. The device will work for 30 seconds after wake up each time then back to standby.

Model	Battery Type
