

SEQ SERIES ACCESS CONTROL BOLLARDS

The SEQ Series of bollards accommodate a range of access control accessories including proximity readers, intercoms, push buttons, cameras and access keypads. The integrated rain and sun shields make the range suitable for both indoor and outdoor applications.

Choose from either a yellow or black powder coated finish. Custom sizes and custom colours are also available on request.

We also offer a custom design and manufacturing service for special applications, along with a standard range of CCTV camera housings and mounting accessories. Visit our website or speak to our staff for more details.

SERS3618Y

SERS

Rain hood with aluminium mounting panel. Ideal when you need to use the full height and width of the panel and not have to consider the front panel fasteners and frame behind.

SERH3618Y

SERH

Rain hood with 10mm polyethelene mounting panel. A non-conductive back plane for sensors, easily cut and drilled.

SERS RAINHOODS

The SERS Series rainhoods allow mounting of intercoms, readers and keypads on the visible area of the front panel.

Marking and cutout is simplified by the plastic protective coating and return folded edges providing height to allow a jigsaw blade to clear working surfaces below.

Mounting panel is locked into place by fasteners on the underside and angled shape locking top design.
